

# General Software Solutions

// SERVICES & PRICING

# Everything you need to build, ship & scale.

---

We build large-scale, complex SaaS and platforms, not just websites. Your project gets the focus it deserves.

## Website Development

Custom websites built for performance, SEO, and conversion. From landing pages to multi-page corporate sites.

from €800 / project

## Web Platform / SaaS

Full-cycle development from idea to deployment and CI. Scalable backends, dashboards, and SaaS platforms.

from €2,500 / project

## Mobile App

iOS and Android apps, native or cross-platform (React Native / Flutter). From MVP to production-ready.

from €3,500 / project

## UI / UX Design

User research, wireframes, Figma prototypes, and design systems. Design that converts and delights.

from €500 / project

## DevOps & Cloud

CI/CD pipelines, containerisation, Kubernetes, AWS/GCP/Azure infrastructure design and management.

from €1,200 / project

## Hosting & Maintenance

Managed hosting with uptime monitoring, security patches, backups, and ongoing technical support.

from €80 / month

## E-commerce Store

Custom e-commerce with payment gateways, inventory management, and conversion optimisation.

from €1,500 / project

## AI / ML Integration

LLM integrations, custom ML models, recommendation engines, and AI-powered feature development.

from €2,000 / project

## Blockchain / Web3

Smart contracts, DApps, NFT platforms, DeFi protocols, and on-chain integrations.

from €3,000 / project

## SEO & Performance

Technical SEO audits, Core Web Vitals optimisation, structured data, and ongoing search visibility.

from €400 / project

## Branding & Identity

Logo design, visual identity systems, brand guidelines, and communication strategy.

from €600 / project

## API Development

RESTful and GraphQL APIs, third-party integrations, microservices architecture, and API documentation.

from €800 / project

STARTER

# Launch

€1,200 flat

---

- ✔ Landing page (up to 5 sections)
- ✔ Responsive design & mobile-first
- ✔ Basic on-page SEO
- ✔ 1 month hosting & support
- CMS / admin panel
- Custom integrations

MOST POPULAR

# Growth

€3,800 flat

---

- ✔ Full website (up to 12 pages)
- ✔ CMS & admin dashboard
- ✔ SEO audit + structured data
- ✔ 3 months hosting & support
- ✔ Analytics integration
- AI / ML custom features

# Scale Custom

---

- ✔ Full platform / SaaS product
- ✔ UI/UX design system
- ✔ DevOps & cloud architecture
- ✔ Ongoing retainer support
- ✔ AI / ML & integrations
- ✔ Dedicated project manager

## // WHERE WE FIT BEST

We build many large-scale, complex SaaS applications and platforms. When we're a good fit:

### 01 Large-scale SaaS & web platforms

Auth, dashboards, billing, multi-tenant, complex workflows.

---

### 02 E-commerce & marketplaces

Stores, multi-vendor, payments, inventory.

---

### 03 Internal tools & operations

Admin panels, reporting, automation.

---

### 04 MVPs & validation

Ship a working MVP fast to test with users or investors.

---

### 05 Mobile apps

iOS & Android, native or cross-platform.

---

### 06 Integrations & APIs

CRMs, payments, custom APIs.

---

## // QUICK ANSWERS

Common questions about pricing, timeline, and how we work.

---

### **How do you price projects?** +

We quote on scope, complexity, and timeline. Get an indicative quote via our site; we'll refine it after a short call. Payment plans available for larger projects.

---

### **What tech do you use?** +

Battle-tested stack: Next.js, React, Node, NestJS, Laravel, Vue, modern clouds. We'll recommend what's best for your product and long-term maintenance.

---

### **How long does a project take?** +

MVPs: often a few weeks. Full platforms: 2–6 months or more. We'll give you a clear timeline in the quote.

---

### **Can you take over an existing project?** +

Yes. We can audit, refactor, or extend existing codebases and help you plan the next phase.

---

### **Do you sign NDAs?** +

Yes. We can sign an NDA before discovery or technical discussions.

---

### **Do you provide post-launch support?** +

Yes. We offer ongoing support, maintenance, performance monitoring, and feature iterations.

---

### **How do we communicate during the project?** +

Typically via Slack, email, and weekly checkpoints. We keep communication fast and transparent.

---

### **Can you work with our in-house team?** +

Absolutely. We can plug into your existing team and collaborate on architecture, delivery, and QA.
